Dear Friends,

2016 has been an exciting, eventful and pivotal year for us at Lionel—and we’re not done yet! Our entire company is engaged to bring you the best model trains possible with new product, product lines and product improvements around every corner. We think you’ll agree that this is one of our best catalog years yet—and Volume 2 picks up right where we left off.

We introduce two new scale diesels to the lineup in this catalog—the SD45 and NW2—both featuring multiple body style tooling to capture road name-specific details. The SD70ACe returns this year with new detail options as well.

Scale steam comes in all sizes, from 2-6-0s to 2-8-8-2s. Pennsylvania fans will enjoy a “really big” new variation on the perennially popular K4!

We’re introducing smaller but very notable changes to our new freight cars in this catalog as well. We have redesigned our trucks to make them easier to convert to 2 rail operation and body mounted scale couplers. You’ll see the conversion on new cars starting with the PS-1 and 50’ double door boxcars in this catalog. The new trucks are also featured on all of our new LionScale™ freight cars—decorated and assembled right in our North Carolina headquarters.

Speaking of small freight car wonders, whether you’re a fan of logging railroads or just looking for something different and unique, you’ll love our new freight car series built upon our successful logging disconnect truck design! Starting with four freight cars and a caboose, these compact models are packed with character! Some show up in our Heisler logging set as well!

Our LionChief™ Plus line continues to grow with new road names on the GP7 and Mikado locomotives. This includes three special Mikados to complement our Halloween, Presidents and new World War II collections.

The fun new products go beyond the trains in this catalog with several new buildings, kits and layout details to add excitement to your layout.

Our team has worked hard to bring you the latest innovations, exciting new products and product lines possible. We’re sure you’ll share in that excitement as you read through the pages that follow.

The Lionel Team
OPERATION

LEGACY® Control System
Lionel is moving forward with a Built-To-Order process for a number of our high end steam and diesel engines. We want to enhance the collectible nature for the products you purchase as well as ensure we are able to continue to offer new and innovative items in the future. You will see the following icon on the product pages that feature Build-To-Order products. Please check with your local dealer and on Lionel.com to ensure you do not miss the order window.

ODYSSEY II Speed Control
Slow speed and start-up operation are smooth and steady with ODYSSEY II Speed Control. Watch your locomotive as it creeps through the yard or fights up a grade without hesitation.

Trainmaster Command Control
Locomotives equipped with the classic TrainMaster Command Control system are controlled by commands from your CAB-1 or CAB-2 Remote Controller. ElectroCouplers™, basic sounds, and multiple unit lash-ups are all at your fingertips as you walk around your layout.

ElectroCouplers™ (LEGACY®, LionChief™ Plus, TMCC® required)
Open these couplers anywhere on the layout without uncoupling track sections. The CAB-1 or CAB-2 Remote Controller activates the ElectroCouplers™. Also, be sure to listen for authentic sounds of the coupler in operation with the RailSounds® sound system.

Wireless Tether™ Connection
Looking to enhance the appearance of Lionel steam locomotives, we developed the exclusive infrared Wireless Tether connection so that the locomotive and tender can communicate without cumbersome wiring between the units. LEGACY® equipped steam locomotives have a new small profile housing that mounts to the top of the drawbar.

Magne-Traction
On some classic or Postwar locomotives, the wheels are magnetized, increasing track adhesion for extra traction and stability around curves.

Traction Tires
One or more of the driving wheels are fitted with rubber tires for extra pulling power for hauling long trains. Traction tires grip the rails, enhancing tractive effort.

LionChief® Remote control
Slow speed and start-up operation are smooth and steady with ODYSSEY II Speed Control. Watch your locomotive as it creeps through the yard or fights up a grade without hesitation.

LionChief™ Plus Remote Control
Using the same remote system of the basic LionChief, LionChief™ Plus locomotives feature everything described in basic LionChief, PLUS many additional hi-tech features that increase the realism of your operations. Additional features include fan-driven smoke, ElectroCouplers, flickering firebox on steam engines, RailSounds®, speed control, higher detail, and the ability to operate with either a remote controller or a traditional transformer at the flip of a switch on your locomotive. LionChief™ Plus provides high-tech features at an affordable price.

Plug-Expand-Play
This revolutionary accessory system simplifies the setup and operation of your favorite accessories. Plug-Expand-Play accessories easily connect to your layout for power using a standardized 3-pin cable that connects directly to a Plug-Expand-Play Lock-on track section. Separate control boxes that are necessary for control of some accessories also use the easy-to-use cable system. Many multi-operation accessories utilize a standardized 6-pin control cable, and there are separate-sale cables that allow you to expand your system to meet your needs. More complicated wiring necessary on older accessories is simplified with the new standardized cable system fitted on every Plug-Expand-Play accessory.

SOUND & SMOKE

FreightSounds
Realistic sounds aren’t limited to locomotives! With a FreightSounds-equipped car, you’ll hear the sounds of the train as it rolls along — the clackety-clack of the rails, the squeal of the wheels, the bumps and thumps of the cars in motion.

RailSounds®
Widely regarded as the industry standard, the impressive RailSounds® sound system brings the real sounds of the railroad to your layout. From the mechanical symphony of the locomotives, to the commotion of the station, you will be impressed by the digitally recorded samples of these special and authentic sounds.

LEGACY® Real-Time Quilling Whistle/Quilling Horn
On the CAB-2 remote, push up and ring the warning bell control button one ring at a time with your own rhythm signature! Pull down on the lever and the horn/whistle responds with increasing intensity. Like a real engineer, you develop your own signature sound, “quilling” the steam whistle or changing the harmonics and intensity of the diesel horn.

Braking Sounds
Press down on the brake button of your CAB-2, CAB-1L, or CAB-1 to reduce speed incrementally or rapidly decrease your throttle and listen for the screeching of your locomotive’s brakes. Start-up and Shut-down Listen as the diesel engine turns over or the steam locomotive comes to life. You will also hear the sounds of the giant locomotive gradually fade away when you turn off power.

DynaChuff™
A favorite feature among steam fans, DynaChuff is the varying intensity of the locomotive’s chuffing, synchronized with the speed of the locomotive.

CrewTalk™ Communication and TowerCom™ Announcements (LEGACY® required for complete feature set)
This is radio communication between your locomotive and tower. “You’re cleared outbound”, orders the dispatcher and the engineer replies. You can trigger different conversations, depending on your choice of button-press and whether the locomotive is in motion or stopped. Change to any of six railroad speeds with accompanying dialog or hear your engineer report his status while en route.

Smoke
Fan-driven smoke units provide a steady flow of smoke, and puffing smoke units create short blasts of smoke as the locomotive moves along the track. For the most realistic smoke effects, synchronized smoke units coordinate the blasts of smoke with the revolution of the drivers and the DynaChuff sounds of the locomotive.

Steam Effects
These smoke effects bring select steam locomotives to life like never before. Each steam effect features a blast of smoke to simulate steam shooting from the whistle, blowdown, or cylinder valves, often along with the authentic corresponding sound.
SOME LIONEL BASICS

Gauge
Gauge refers to the distance between the outside rails of the track. Lionel O-Gauge track systems—which include O, O27, and FastTrack—all measure 1 1/8” between the outer rails. Any O-Gauge car or locomotive can ride on Lionel O-gauge track, as long as the curve track used on your layout can accommodate your particular cars (see Minimum Curve section).

Scale
Scale measures the relationship between a model and the real thing. Most Lionel cars generally measure about 1:48 scale. This relationship is approximate for the Lionel Traditional line of cars and locomotives, which typically can run on layouts with tight curves (like O27 or O31). Lionel Standard O freight cars and engines, which are made to be as exact as possible to 1:48 scale, oftentimes require a wider minimum curve, such as O36 or more.

Minimum Curve
This measurement is very useful in purchasing track, locomotives, and rolling stock that are compatible with one another. For example, assemble O72 curved track into a circle and you will have a 72” diameter layout. Assemble O31 curved track into a circle, and you will have a layout 31” in diameter. A locomotive with a Minimum Curve requirement of O31 will run on a layout with O72 curves, but a locomotive with a Minimum Curve requirement of O72 will not run on a layout with O31 curves.

Traditional vs. O Scale
Lionel O-Gauge locomotives and rolling stock are divided into two basic categories—Traditional and O Scale. Both lines are O-Gauge and can be run together if Minimum Curve requirements allow. Generally, the difference is a matter of size and consistent proportions. O Scale locomotives and cars are kept as close to scale dimensions as practical. Traditional O locomotives and cars may be compressed to better operate on tight curves.

Recommended Minimum Curve
Lionel locomotives and rolling stock are thoroughly tested to determine their Minimum Curve requirement. In some cases, a Lionel car or locomotive may be able to easily negotiate most, but not all, possible track configurations for that Minimum Curve. For these products, a Recommended Minimum Curve is also given. This larger measurement allows for all combinations of Lionel track and switches.

BUILT TO ORDER
Lionel is moving forward with a Built-To-Order process for a number of our high end steam and diesel engines. We want to enhance the collectible nature for the products you purchase as well as ensure we are able to continue to offer new and innovative items in the future.

You will see the icon above on the product pages that feature Build-To-Order products. Please check with your local dealer and on Lionel.com to ensure you do not miss the order window.

ILLUSTRATION

Directional Lighting
When in reverse, Command Control equipped diesel locomotive headlights will shut off. The rear light or headlight of a second diesel will then illuminate. In Command Control equipped steam locomotives, the headlight remains illuminated in forward or reverse operation. Additionally in reverse, the tender back-up light will shine on tenders equipped with a rear directional lamp.

Classification Lights and Marker Lights
Classification lights are located on the boiler front or top of some steam locomotives, while marker lights are on the rear of some steam locomotive tenders. These lights are also located on the ends of some diesel locomotives.

MARS Lights
Mars lights are a warning light on the front of some steam and diesel locomotives. Real Mars lights moved back and forth across the track like a “8” our models recreate this effect with a pulsating LED.

Lighted Number Boards
Brightly illuminated, the locomotive’s unique road number is displayed on the boiler top of some steam locomotives and on the ends of some diesel locomotives.

Strobe Light
This flashing warning light is located on the cab roof of some diesel locomotives.

Ditch Lights
These low-mounted lights serve as close-range secondary headlights on some diesel locomotives.

Variable Ashpan Glow
Start up a Lionel steam locomotive equipped with this feature and look for a red glow on the outside of the locomotive between the ashpan and firebox. As speed increases, the light grows brighter, simulating the increased draft onto the fire.

Ground Lights
These low mounted lights are located below the cab on the sides of some steam and diesel locomotives. They face downward toward the ground to help the crew gauge diesel movement at slow speeds. Glowing Firebox and Flickering Firebox A red glow steadily emanates from the firebox inside of the cab of Lionel steam locomotives equipped with the glowing firebox. Steam locomotives equipped with a flickering firebox create the illusion of a live fire “flickering” within.
LEGACY® Locomotives

LEGACY STEAM FEATURES

- Legacy® Control System equipped – able to run in LEGACY Control mode, in TrainMaster® Command Control mode, or in Conventional mode with a standard transformer
- Odyssey® II Speed Control with On/Off switch
- LEGACY RailSounds® sound system featuring:
  - CrewTalk™ dialog and TowerCom™ announcements, each with different scenarios depending on whether the locomotive is in motion or stopped
  - Six official railroad speeds with CrewTalk dialog
  - DynaChuff™ synchronized with 32 levels of intensity as the locomotive gains speed
  - LEGACY “Real-Time Quilling Horn” control with instant response for realistic signature “quilling” and correctly timed warning signals
  - Single hit or continuous mechanical bell sounds
  - Sequence Control: plays the sound effects of an entire trip, including warning sounds and announcements, based on the movement and speed of the locomotive
  - Current speed and fuel dialog, coal loading sound effects
  - IR Transmitter works with LCS SensorTrack™
  - Powerful maintenance-free motor with momentum flywheel
  - Wireless Tether™ connection between locomotive and tender
  - ElectroCoupler™ on rear of tender
  - Directional lighting including operating headlight and back-up light on rear of tender
  - Illuminated classification lights on the front of locomotive
  - Traction tires
  - Interior illumination in cab
  - Die-cast metal locomotive body, pilot and trucks
  - Die-cast metal tender body and trucks
  - High level of separately applied metal details
  - Separately applied builder’s plates
  - Synchronized fan-driven smoke unit
  - Adjustable smoke output
  - Authentically detailed cab interior
  - Whistle Steam
  - Included on specific steam locomotives
  - Cab “glass” windows
  - Engineer and fireman figures

LEGACY® STEAM LOCOMOTIVES ON PAGES 8-17 ARE EQUIPPED WITH THESE AMAZING FEATURES!
LEGACY® DIESEL FEATURES

• LEGACY® Control System equipped – able to run in LEGACY® Control mode, in TrainMaster® Command Control mode, or in Conventional mode with a standard transformer

• Odyssey® II Speed Control with On/Off switch

• LEGACY® RailSounds® sound system featuring:
  - CrewTalk™ dialog and TowerCom™ announcements, each with different scenarios depending on whether the locomotive is in motion or stopped
  - Six official railroad speeds with CrewTalk dialog
  - Eight diesel RPM levels
  - LEGACY® “Real-Time Quilling Horn” control with instant response for realistic signature “quilling” and correctly timed warning signals

• Single hit or continuous mechanical bell sounds

• Sequence Control: plays the sound effects of an entire trip, including warning sounds and announcements, based on the movement and speed of the locomotive

• Current speed and fuel dialog, refueling sound effects

• ElectroCoupler™ on front and rear

• Traction tires

• Refined Conventional Transformer Control Mode with lower starting speeds

• Fan-driven smoke unit

• Adjustable smoke output

• Directional lighting including LED headlights

• Illuminated number boards

• Lighted cab interior

• Die-cast metal trucks, pilot, and fuel tank

• Metal frame

• High levels of separately applied metal details

• Engineer and conductor figures

LEGACY DIESEL LOCOMOTIVES ON PAGES 18-29 ARE EQUIPPED WITH THESE AMAZING FEATURES!
Weathered Y6B

ADD A TOUCH OF REALISM TO YOUR LAYOUT!

For the fourth year in a row, Lionel is excited to team up with Harry Hieke and create a truly special, one of a kind locomotive that is sure to be a conversation piece on your layout. Featuring a touch of realism with faded lettering, mud, dirt, dust and rust, this Y6b represents just a few of the daily issues all engines faced on the railways. This Limited Edition weathered locomotive, just like previous years, will only be featured in our Lionel Volume 2 Catalog.

NORFOLK AND WESTERN’S STEAM IS NOTHING SHORT OF LEGENDARY

The Y6B class represented the ultimate refinement of their mountain climbing coal-hauling powerhouse – the mainstay of their business. Lionel’s release of this locomotive features LEGACY® Whistle Steam and a stunning level of detail worthy of the prototype’s lofty reputation.

See page 6 for LEGACY Steam features!

ADDITIONAL FEATURES

- Whistle steam
- Length: 30”
- Minimum Curve: O72

Meet The Artist: Harry Hieke

Harry Hieke, a long time train enthusiast from early childhood started with his first Lionel Scout at age 5. In 1985 he began designing and weathering products for friends and made it a full time career in 1998. Harry has made over 75 prototypes for Lionel including the Rockville Bridge, MG Tower, oil tank farm, and even scale telephone poles. His passion lies around creating detailed models with real life weathered finish.

You can find additional examples of his work by typing Harry Hieke into Youtube.

NEW!

WHISTLE STEAM

LIMITED QUANTITIES AVAILABLE. CONTACT DEALER TO ORDER.
In 1930, the Pennsylvania paired 10 of its K4s Pacifics with “coast-to-coast” tenders to reduce coal and water stops on long-distance runs. Water scoops and track pans further extended their range. Fully loaded, these tenders weighed more than the locomotives themselves! These K4s were a regular feature on Blue Ribbon passenger trains, including the Broadway Limited, when every minute of the schedule counted.

Paired for the first time in the Lionel catalog, these K4s feature pre-war styling, whistle steam and a P-20-70 class long-haul tender.

**ADDITIONAL FEATURES**

Moguls

Perfectly sized for light duties on the mainline or branch lines, the 2-6-0 could be found on freight, passenger and mixed trains. The design proved especially popular and long-lived in New England where they were frequently found on the many daily milk trains.

The reliability of their design is proven by the numerous examples which survive in service today.

Heisler Log Train Set

Capture the adventure of a logging train in this new set. Featuring our 3-Truck Heisler with LEGACY and whistle steam, two pair of disconnect log cars with loads, and a flatcar and caboose which capture the home-built look of most lumber company’s rolling-stock, this set is the start to your logging empire.

SET INCLUDES
- Heisler #5
- Two logging disconnects
- Disconnect flatcar
- Disconnect logging caboos

HEISLER FEATURES
- See LEGACY Steam locomotive features on page 6.

ROLLING STOCK FEATURES
- Die-cast construction on logging disconnects for reliable operation loaded or empty
- “Ribbed back” wheels
- Realistic molded log loads included
- Easy conversion to scale couplers
- Detailed interior in caboos
- Plastic bodies on all cars

SET FEATURES
- Length: 42 1/4”
- Minimum Curve: 031

Keep adding to your set! See additional disconnect cars on pages 36-37.

A A
Introduced with great fanfare in 1963, the SD45 was equipped with an enormous 20 cylinder version of EMD’s new 645 engine block, generating 3600 horsepower. The promise of power caught the railroads’ attention and the distinctive flared radiator screens were equally as popular when watching from trackside.

Lionel’s new SD45’s bring all of the distinctive details of these massive locomotives to your roster with new tooling to capture unique road name specific details. These models also feature our kinematic pilots designed for better appearances on tight curves and easier conversion to fixed arrangements and scale couplers.

ROAD SPECIFIC DETAILS ON THE SD45 INCLUDE
- Short hood style
- Handbrake placement
- Traction motor blower duct length
- Fan style
- Trucks
- Horn type / location
- Lighting
- Rooftop details

ADDITIONAL FEATURES
- Length: 17”
- Minimum Curve: 054
NEW! Erie Lackawanna #3632 Bicentennial
6-83370  $649.99

SD70ACe

Modern power for your contemporary layout, the SD70ACe is a common sight on today’s railroads. With their AC traction motors, the SD70ACe was designed with heavy trains in mind. Perfect for a long string of rotary dump gondolas (check out page 62-63!) a mixed freight or even a modern intermodal train, you’ll find lots of uses for these on your roster.

Lionel is happy to bring these locomotives back in some colorful new paint schemes as well as correct cab or nose headlight arrangements for the first time!

From rail yards to branch lines to industrial use, the NW2 provided reliable and efficient motive power for switching and local freight use. EMD’s best-selling switcher of all time, the NW2 could be found on the largest and smallest of railroads as well as in many industrial settings. Dozens are still going strong today!

Over the long production run of the locomotive, there were several variations in design. The most common of these changes were the louvers in the hood doors and styling of the side sills. Lionel is bringing this pivotal prototype to our roster of scale diesels with all new tooling which will capture the many detail variations found between the different prototypes including the changing body styles. The locomotives feature fixed pilots with scale coupler mounting pads for easy conversion.

Lionel is proud to introduce the new LionScale™ line of affordable O scale freight cars for the operator and collector. Painted, decorated and assembled in Lionel’s own North Carolina facility from parts made in the USA and imported, LionScale™ delivers reliable performance, rugged details and realistic graphics. Each car is available in multiple road numbers and value-priced for those who like to run long trains.

- Die-cast trucks and couplers
- Easily converted to 2-rail (with separate sale components)
- Prototypically accurate paint schemes & multiple road numbers
Decorated and assembled in Lionel’s Concord, NC headquarters
In the late 1970s, new standard designs emerged for the general service boxcar. While the prototypes for this car came from ACF, very similar cars came from many other builders. Delivered to large railroads, leasing companies and shortlines in many colorful paint schemes, hundreds of these cars are still rolling today.

**ADDITIONAL FEATURES**
- Opening side doors
- Rotating bearing caps on trucks

**SEE PAGE 138 FOR 2 RAIL CONVERSION KIT**
3-Bay Offset Hopper

Based on an AAR design adopted by many railroads, these hoppers were found around the country in the steam – diesel transition era. Six to twelve road numbers per road make these cars perfect for your long coal trains! Models feature flat or rounded ends as appropriate for each road as well.

E Chesapeake & Ohio - Set 1
Individual Cars $54.99
3-16080 Chesapeake & Ohio - Set 1 (6-Pack) $329.99

F Chesapeake & Ohio - Set 2
Individual Cars $54.99
3-16090 Chesapeake & Ohio - Set 2 (6-Pack) $329.99

G Santa Fe
Individual Cars $54.99
3-16050 Santa Fe (6-Pack) $329.99

H Baltimore & Ohio
Individual Cars $54.99
3-16060 Baltimore & Ohio (6-Pack) $329.99

I Boston & Maine
Individual Cars $54.99
3-16070 Boston & Maine (6-Pack) $329.99
3-BAY 9-PANEL HOPPER

Exterior post hoppers like these were also common in the transition era. Putting the support posts on the outside of the car body reduced capacity but kept the structural parts away from the acidic coal dust.

- **Western Maryland**
  - Individual Cars: $54.99
  - 3-16130 Western Maryland (6-Pack): $329.99

- **Alaska**
  - Individual Cars: $54.99
  - 3-16100 Alaska (6-Pack): $329.99

- **Chessie**
  - Individual Cars: $54.99
  - 3-16110 Chessie (6-Pack): $329.99

- **Southern**
  - Individual Cars: $54.99
  - 3-16120 Southern (6-Pack): $329.99

6 ROAD NUMBERS PER ROAD NAME

---

34
Common on rails across North America from the 1970s to today, these covered hoppers can be found in both colorful and simple paint schemes for railroads, leasing companies and co-ops. Many have changed hands multiple times over their long careers resulting in even more variety.

**ADDITIONAL FEATURES**
- Rotating bearing caps on trucks

**PS-2CD COVERED HOPPER**

**UNIQUE PATCHES ON EACH RFMX CAR!**

**6 ROAD NUMBERS PER ROAD NAME**
DISCONNECT FREIGHT CARS

Capturing the spirit of the often-improvised freight cars found on logging and industrial railroads, Lionel’s new disconnect freight cars are a whimsical and compact fleet of rolling stock packed with detail and charm in a size that will operate on any curve!

Look for additional freight and passenger car sets to complement this new line in coming catalogs.

DISCONNECT FREIGHT CARS FEATURE

NEW! Disconnect Logging Caboose - Brown #6
6-83566 $39.99
Designed to shuttle molten steel from the blast furnace to the casting house, hot metal cars are among the most interesting of the extreme trains found in the mills. After receiving a load, these hot bottles must be shuttled quickly. At the pour site, the large cylinders rotate to expel the hot and heavy load so that it can be poured into slabs or ingots.

The hot metal cars’ trips are usually kept to short distances within the complex, but there are many examples of these cars being shuttled between mills miles apart. When they are, they always receive the railroad’s top priority. You don’t need to model the entire mill to enjoy these cars on your layout. Add some old gondolas as spacers, couple up your favorite locomotive and caboose and get them rolling!

**FEATURES**
- Hidden uncoupling tab
- Flickering hot metal load
- Authentic paint schemes
- Manually rotating hot metal drum
- Die-cast metal frame and hot metal drum
- Length: 11 1/4”
- Minimum Curve: O31

**Price Information**
- A US Steel Hot Metal Car 2-Pack  6-83481  $199.99
- B Hot Metal Car 2-Pack (Number Only)  6-83484  $199.99
- C Weathered Hot Metal Car 2-Pack (Number Only)  6-83487  $199.99
- D Bethlehem Steel Hot Metal 2-Pack  6-83478  $239.99
Slag is the byproduct of steel making, made up of many different impurities. After tapping the furnace for steel, the slag is collected and sent to a separate facility for processing. Far from waste, slag can be reclaimed and used as an aggregate.

Trains of slag pots carry the still-molten materials to large pits where they can be dumped to harden and cool.

We’re bringing back our slag and hot metal cars in two familiar road names with all new road numbers. The cars feature die-cast construction, a flickering and glowing load and a ladle which can be manually turned. Steel mill cars perform demanding work and don’t stay clean for long! So we’ve also added a new unlettered scheme with only a number and weathered models typical of many mill cars.

Features:
- Die-cast metal sprung trucks and operating couplers
- Hidden uncoupling tab
- Flickering slag load
- Authentic paint schemes
- Manually rotating slag bucket
- Die-cast metal frame and slag bucket
- Separately applied detail parts
- Length 7 1/4" each
- Minimum Curve: 031

**Milk Cars**

Built in the early 1900’s and active through the 1950’s, these unique freight cars were equipped with twin glass-lined tanks to keep milk cool and fresh. They were typically coupled to passenger trains in order to get the fresh perishable cargo to its destination as quickly as possible. Lionel’s scale milk car features two milk tanks that are viewable underneath the removable roof or when the hinged doors are opened. They also feature realistic die-cast metal passenger trucks and sprung buffers just like the prototype.

**Features**
- Die-cast metal passenger-style sprung trucks with operating couplers
- Die-cast metal underframe details
- Die-cast metal sprung buffers
- Opening hinge-style doors
- Removable roofs
- Interior milk tanks and piping
- Metal brake lever and brake chain
- Separately applied realistic details
- Length: 11 3/4”
- Minimum Curve: O31

Grain Door PS-1 Boxcars

For bulk loading of grain, boxcars were equipped with temporary “grain doors” which held back the contents. While loading and unloading were more time consuming than with a hopper, the boxcar could be used year-round in general service until needed for the grain rush. Boxcars remained a common method of grain shipments into the 1970s.

These new models add a new twist to Lionel’s beautifully detailed PS-1 boxcars and are ready to handle your railroad’s wheat rush!

FEATURES
- Die-cast metal sprung trucks and operating couplers
- Easily converted to scale couplers
- Separately applied metal underframe details
- Opening doors
- Grain doors
- Simulated grain load
- Length: 11 1/4”
- Minimum Curve: O31

Hi-Cube Boxcar Sets

Designed mainly for hauling auto parts, Pullman Standard's 86' Hi-Cube boxcars were first built in the 1960s and are still a colorful sight on the railroads today.

Like scale Autorack cars by Lionel, the 86' Hi-Cube Boxcar is the perfect freight car to run behind any modern diesel locomotive. With a specially designed coupler that adjusts around curves, these long cars are able to run on curves as tight as O54!

**FEATURES**

- 1:48 scale
- Die-cast sprung trucks with rotating bearing caps
- Die-cast operating "Kinematic" couplers auto adjust for close coupling on straightaways and wider coupling on curves
- Includes scale draft gear-mounting hardware for easy conversion to Kadee® scale couplers
- Centered double-doors version on Santa Fe, Milwaukee, Frisco, and NYC
- Non-opening side doors
- Unique road numbers on each car
- Length: 21 1/2" (each)
- Minimum Curve: 054

**EACH SET INCLUDES TWO UNIQUELY NUMBERED CARS**

86' 8-Door Hi-Cube Boxcars

Built originally in the 1960s, 86' Hi-cube boxcars are still a colorful sight on the railroads today. In addition to the centered 4-door version already released, Lionel now offers an all-new 8-door configuration featuring two split sets of doors on each side of the boxcar. Equipped with specially designed couplers that adjust around curves, these long and realistic cars are suitable to run on curves as tight as O54.

**Features**
- 1:48 scale
- Die-cast sprung trucks with rotating bearing caps
- Die-cast operating “Kinematic” couplers auto adjust for coupling on straightaways and wider coupling on curves
- Includes scale draft gear-mounting hardware for easy conversion to Kadee® scale couplers
- Separately applied details
- Non-opening side doors
- Unique road numbers on each car
- Length: 21 1/2"
- Minimum Curve: O54

**60' Boxcars**

Most commonly seen hauling heavier auto parts, these 60' cars can be used in many roles. Use them in a general freight train, or with the Lionel 86' boxcars and scale autoracks to serve an auto assembly plant.

**Features**
- Die-cast metal sprung trucks and operating couplers with hidden uncoupling tabs
- Rotating bearing caps
- Separately applied metal underframe and body details
- Opening doors
- Length: 16" 
- Minimum Curve: O36

TWIN HOPPERS

The Pennsylvania Railroad built more than 30,000 GL A hoppers between 1904 and 1911. Similar cars were rostered by several other roads as well with thousands of cars still in service as late as the 1960s. The Pennsylvania’s GLA design was also similar to other standard 50-ton, twin-bay designs produced in 1905 and the later USRA standard hopper used by many roads.

Lionel is tooling this model with multiple detail sets to replicate the major differences between the Pennsylvania GLA, “1905 Common Design” and USRA standard hoppers as appropriate for each road name.

FEATURES

- 1:48 scale
- Die-cast metal sprung trucks with operating couplers and hidden uncoupling tabs
- Durable plastic body with die-cast metal frame
- GLA-specific side frames on Pennsylvania and New Haven cars
- Accurate USRA-style details on CB&Q
- High level of separately applied detailed parts
- Road and era-specific details including end sills, post, hand brakes, and hopper doors
- Frames feature Kadee® coupler mounting pads for easy conversion to scale couplers
- Removable coal load insert
- Detailed hopper interior
- Length: 8” (each car)
- Minimum Curve: 031

Legacy Crane Cars

These operating cars bring the highest level of action to scale railroading. Pull the car into position and run M.O.W. operations anywhere on your layout. Offering fullest remote control operation from a CAB-2 Remote Controller, they are also operable from your CAB-1 or CAB-1L remote.

Rotate the cab 360 degrees, lower and raise the boom and two hook lines, deploy the six outriggers and control front and rear lights – all from your remote controller! Matching LEGACY® Boom Cars with sound are available for each road name.

Features
- LEGACY® Control System-equipped operation including 360-degree cab rotation, up and down action of the boom, independent control of the main and auxiliary hooks, independent control of the front and rear work lights, and deployment of all six outriggers
- CAB-2, CAB-1L, or CAB-1 remote control required
- Four powerful, maintenance-free motors
- Die-cast metal six-wheel sprung trucks
- Front and rear ElectroCouplers™
- Die-cast metal body, frame, and boom
- Operating front and rear work lights
- Opening cab doors
- 6 outrigger supports included
- Length: 10 1/4”
- Minimum Curve: O31

A Southern Pacific 6-81881 $499.99

C DT&I 6-81882 $499.99
D M.O.W. 6-81885 $499.99
Legacy Boom Cars

Add realistic crane and work crew sounds to the action by adding a matching boom car to your crane operations! Realistic sounds are synchronized to crane actions including rotating cab, engine effort, boom and hook adjustments, and outriggers engaging. You’ll hear the work crew too as the action unfolds, and you can even add your own signature crane air horn “quill” through your CAB-2 remote control.

Features:
- LEGACY® Command Control-equipped
- LEGACY RailSounds® sound system including diesel engine revving, air horn, sound of coupler activation, and multi-part crew/foreman dialog
- Synchronized boom, winch, and outrigger sound effects
- Special start-up and shut-down sequences
- Die-cast metal trucks and operating couplers with hidden uncoupling tabs
- Die-cast metal flatcar
- Wood flatcar deck
- Metal underframe and body details
- Length: 11 1/4”
- Minimum Curve: O31

M.O.W. 6-81889 $239.99

O Scale | Operating Cars
PS-1 Boxcar with Sound

Add realistic freight car sounds throughout your train with these new PS-1 boxcars! Finished in multiple popular roadnames so you can add as much sound as you’d like without duplication, each car plays the clickety-clacks, bumps, squeals, thumps and grinds as the train rolls along.

We recommend positioning a few standard cars between your locomotive and each sound car in the train for an amazing stereo effect.

FEATURES
- Realistic sound that replicates train sounds play when car is in motion
- Rail clatter
- Wheel flange squeal
- Coupler slack bumping
- Each car includes a BABY FATBOY SPEAKER & sound enclosure for optimum sound performance
- Operates on any conventional or command control layout
- Volume control and on/off switch
- Maximum / Minimum switch
- Die-cast metal sprung trucks with operating couplers with hidden uncoupling tabs
- Opening Youngstown or Superior doors per prototype
- Length: 11 1/4"
- Minimum Curve: 031

LionChief™ Plus Diesel and Electric Locomotives Features

- User-selected operational modes: Conventional AC transformer control mode or LionChief® wireless remote control with AC or DC power
- On/Off switches for sound, smoke and control mode (no smoke switch on Rectifiers)
- ElectroCouplers™ on front and rear (controlled by remote only)
- Rear coupler on FT AA sets are fixed
- RailSounds RC™ sound system with diesel revving and background sounds for the diesels, and electric engine roar for Rectifiers, horn, bell, and user-activated announcements
- Adjustable volume (controlled by remote only)
- Fan-driven smoke (except Rectifiers)
- Smoke output from every stack
- Dual maintenance-free motors
- Single maintenance-free motor on NW2
- Constant control for consistent speed at all ranges regardless of track condition or load
- Operating headlights with directional lighting
- Cab crew figures (except NW2)
- Lighted cab interior
- Frosted windows on NW2
- Die-cast metal trucks, pilot, and fuel tank
- Metal frame
- Traction tires

Length:
- Rectifier, GP20, NW2, RS-3, and GP7 14 1/2"
- FT AA Set 26" (13" each car)
- FT B Unit 13"
- Minimum Curve: O31

LionChief™ Plus Remote Features

- Forward and reverse speed control knob
- Buttons for whistle sound, bell, special announcements and ElectroCoupler™ activation
- Requires three AAA alkaline batteries (not included)
LIONCHIEF™ PLUS STEAM LOCOMOTIVES FEATURES

- Conventional AC transformer control mode or LionChief® wireless remote control with AC or DC power
- ElectroCoupler™ on rear of tender (controlled by remote only)
- Operating headlight
- Synchronized fan driven smoke
- On/Off switches for sound and smoke
- RailSounds RC™ sound system with steam chuffing and background sounds, whistle, bell, and user-activated announcements
- Adjustable volume (controlled by remote only)
- Speed control for consistent speed at all ranges regardless of track condition or load
- Flickering firebox
- Chuffing sounds in sync with puffing smoke
- Powerful maintenance-free motor
- Die-cast metal locomotive body, frame, and trucks
- Die-cast metal tender body and trucks
- Metal frame on tender
- Engineer and fireman figures
- Traction tires
- Length:
  - Camelback 17 1/2”
  - Mikado, Pacific and Hudson 19”
- Minimum Curve: O31

LIONCHIEF® UNIVERSAL REMOTE

FEATURES

- Control any existing or future 0-Gauge LionChief™ Plus locomotive
- Control most O-Gauge Ready-to-Run LionChief® set locomotives
- Control any existing S-Gauge FlyerChief locomotive
- Load and operate up to three locomotives per remote at any one time
- Choose between any one of the three engines with the simple 3-button control
- LED Illumination on 1-2-3 buttons when pressed
- On/Off Switch to preserve battery power
- Remote “Train Memory” preserves current speed and direction of engine when toggling operation between different locomotives
- Even after power down and restarting remote retains memory of the specific engines loaded in system
- “Easy Clear” feature allows you to quickly remove and add new locomotives into remote memory as needed
- Forward and reverse speed control knob
- Additional buttons for whistle sound, bell, special announcements, and ElectroCoupler™ activation
- Requires three AAA alkaline batteries (not included)

6-83071 $49.99
Rising to initial success during the First World War, the USRA Mikado’s and their copies were still serving proudly when the country returned to battle – though in light of events many railroads proudly renamed them “MacArthur’s” for the duration of the war.

LionChief™ Plus Mikado

First used on the Nippon Railway in Japan in 1897, the 2-8-2 class steam locomotive was nicknamed “Mikado”, meaning “emperor” in Japanese. Gaining popularity in the United States before WWI, numerous 2-8-2 locos thundered across American high iron.

See all LionChief™ Plus Steam features on page 83.
LionChief™ Plus Pacific

Popular for their medium build and substantial pulling power, the 4-6-2 Pacific style steam locomotives were the workhorses of most railroads. Until the arrival of the diesel, the 4-6-2 Pacific was the predominant passenger locomotive in the U.S. and Canada.

See all LionChief™ Plus Steam features on page 83.
LionChief™ Plus Hudson

Made famous by the New York Central and a true Lionel Classic, the celebrated 4-6-4 Hudson type is a favorite among rail fans. See all LionChief™ Plus Steam features on page 83.
The Pennsylvania’s A5 class of 0-4-0s worked hard around the ports and heavy industrial areas they served. Compact and powerful, the 0-4-0 was a popular design for railroads and heavy industries nation-wide. Our scale-proportioned A5 0-4-0 is back for the first time with LionChief™ Plus control. To help serve your customers with ease, this LionChief™ Plus steam locomotive is equipped with both front and rear ElectroCouplers!

See all LionChief™ Plus Steam features on page 83.
These hard coal burners were hard core workers! Designed around a large firebox for burning anthracite coal, the Camelbacks’ cabs straddled the boiler creating a distinctive look and a new set of challenges for the engineer and fireman.

LionChief™ Plus GP38

One of EMD’s most popular second-generation road switchers, the GP38 has been a common sight on railroads across North America since the late 1960s. Used in switching, local and mainline freights, you’ll have no trouble keeping these locomotives busy on your layout!

See all LionChief™ Plus Diesel features on page 82.
EMD’s first turbocharged “Geep,” the GP20 opened the door to a new generation of diesel locomotives. Based on the GP20 and the similar GP18, these colorful locomotives are ready to take your layout to the next level of operation. See all LionChief™ Plus Diesel features on page 82.
Just like the diesel that forever changed the railroads, the LionChief™ Plus FT is ready to revolutionize power on your layout! Each set features a powered and non-powered locomotive. Both units feature smoke, an ElectroCoupler™, and directional lighting!

See all LionChief™ Plus Diesel features on page 82.
LionChief™ Plus FT B-Unit

Need more power? Add additional B units to build your lash up to any desired length! Locomotives are programmed to run on the same channel as their AA set partners. No consisting required!

B-Unit Features
- Powerful maintenance-free motors
- Conventional or LionChief® Remote control
- Works with Matching FT AA set remote
- Magnetic couplers
- Fan-driven Smoke
- Speed control

LionChief™ Plus NW2

The best-selling switch engine of all time, EMD’s NW2 worked everywhere from the loading dock to the freight yards. Some even pulled the occasional passenger train!

See all LionChief™ Plus Diesel features on page 82.
Originally delivered to the Virginian, the E33 electrics traveled to other lines and wore many paint schemes during their careers. See all LionChief™ Plus Diesel features on page 82.
TIE-JECTORS

Add even more action and excitement to your layout with the newest release of Lionel tie-jectors. For the first time ever, this classic motorized unit comes equipped with tie-ejecting Command Control. Run your unit and eject the ties any time you want through the use of your CAB remote controller. You can even activate the tie ejection through your AC transformer on a conventional layout.

FEATURES

- Vehicle motion and tie-ejection operable in both Command Control and Conventional mode
- Unload ties by remote control through your CAB-1, CAB-1L, or CAB-2 controller
- Unload ties on a Conventional layout by using the bell button on transformer
- 20 wooden ties included
- Forward/Reverse operation
- Directional headlight
- Figure included
- Powerful motor
- Length: 7 ¼”
- Minimum Curve: O27

Postwar Inspired: Space & Military

Mercury Space Cars

The big day has arrived and a space launching is about to take place! At the moment the “cherry picker” car is moving into position to board the astronaut. At the end of the countdown, the missile is launched from the Mercury Capsule Car and it’s “go” all the way. When the rocket reaches its full height, the capsule separates and parachutes gracefully back to earth.

A #6512 Mercury Capsule Astronaut Car
Prepare to board the astronaut into the capsule on the launcher car by raising the boom up high.

Features
- Die-cast metal trucks and operating couplers
- Adjustable boom on deck
- “Cherry picker” at end of boom contains swiveling astronaut
- Length: 11”
- Minimum Curve: O27

B #6844 Missile Carrying Car
Postwar Inspired and Ready for Duty

Features
- Die-cast metal trucks and operating couplers
- Includes six removable missiles
- Missiles stand on deck
- Length: 11”
- Minimum Curve: O27

C Aerial Target Launcher

D #943 Exploding Ammunition Dump

E Missile Firing Range
**Aerial Target Launcher**
Watch out for twirling turbo missiles and projectile missiles! Commanders often use the floating balloon on the Aerial Target Launcher for target practice. Can you knock the target balloon out of the sky?

**FEATURES**
- Die-cast metal trucks and operating couplers
- Includes four balloons with Lionel “L” bullseye
- Motorized blower lofts balloon into air
- On/Off blower switch
- Length: 11”
- Minimum Curve: 027

---

**D #943 Exploding Ammunition Dump**

**FEATURES**
- Durable plastic construction
- Structure flies apart when struck by a projectile
- Dimensions: 4” L x 5 ½” W x 2 ½” H

---

**E Missile Firing Range**

Fire missiles at an Aerial target launcher, ammo dump, or other targets!

**FEATURES**
- Durable plastic construction
- Manually activate four missiles to fire in succession
- Upgraded spring mechanism to project missiles further than ever before
- Missile structure hidden behind camouflage “brush”
- Two support holes in base to secure accessory to layout (optional)
- Dimensions: 7 ½” L x 2 ½” W x 3 ½” H

---

**F Poultry Dispatch Sweep Car**

**FEATURES**
- Sound On/Off switch
- Die-cast metal trucks and operating couplers
- Chicken drover sweeps the deck (Remote Uncoupling Track required)
- Realistic chicken sounds runs off of track power
- Metal frame
- Opening doors
- Length: 10 ½”
- Minimum Curve: 027

---

**G M.O.W. Welders’ Car**

**FEATURES**
- Die-cast metal trucks and operating couplers
- LED light simulates the glow of the welder’s torch when car is in motion
- Length: 10 ¼”
- Minimum Curve: 027

---

**Sound Equipped**
With the new Plug-Expand-Play system by Lionel, operating accessories on your layout has never been easier! Usable on any AC or DC powered layout but designed especially for FasTrack® users, the Plug-Expand-Play system simplifies what’s needed to connect your operating accessories. It also minimizes the need to mess with bare wires on any FasTrack® layout. This accessory system is often as simple as the name—Plug the accessory into your powered track and you’re ready to Play!

- Easy set up
- Simple standard cable system
- Improved and simple operation

For railside excitement all along the line!

CONNECTING YOUR PLUG-EXPAND-PLAY ACCESSORY TO PLUG-EXPAND-PLAY FASTRACK®

1. Position your Plug-Expand-Play accessory on your layout
2. Plug accessory into Plug-Expand-Play lock-on
3. Plug in your power supply or Power up your transformer

Refer to your lock-on or accessory’s manual for complete set-up instructions.
A  FasTrack® Plug-Expand-Play Accessory Activator Track Pack
Use your train as a switch to activate your Plug-Expand-Play accessory. When your train passes by, it completes the circuit and routes power to your accessory until the train has passed.

FEATURES
- Includes one 10” insulated track section, and two 5” isolated track sections
- Plug-Expand-Play Power Lock-on made specifically for accessories fitted with a Plug-Expand-Play power cable

B  FasTrack® Plug-Expand-Play Power Lock-on
Your standard lock-on to connect your Plug-Expand-Play accessory to any FasTrack® layout.

FEATURES
- 10” straight FasTrack® with attached Lock-on

C  FasTrack® Plug-Expand-Play Power Block Lock-on
Same as the standard Plug-Expand-Play lock-on with THREE ports instead of one, plug in up to 3 Plug-Expand-Play cables. Choose track power or fixed power (from a barrel jack connector).

FEATURES
- 10” straight FasTrack® with attached Lock-on
- Rocker switch to select power source
- Use separate sale 4A 18VDC power supply or track power
- LED for power indication

D  LionChief® 72-Watt Wall-Pack Power Supply (4 Amp)
Connect the LionChief® 72-Watt Wall Pack Power Supply (or the 36-Watt version found in LionChief® RTR sets) directly to the the LionChief® Terminal FasTrack® to power any LionChief® FasTrack® layout. Now you are ready to run any LionChief® or LionChief™ Plus locomotive, with enough power to expand.

E  8” Female Pigtail Plug-Expand-Play Power Cable
Hook up a Plug-Expand-Play accessory to a non-Plug-Expand-Play layout.

F  6’ Plug-Expand-Play Power Cable Extension (3-pin)
Extend the length of the standard Plug-Expand-Play 3-pin power cable.

G  6’ Plug-Expand-Play Control Cable Extension (6-pin)
Extend the length of the standard Plug-Expand-Play 6-pin control cable.

NOT SHOWN
3’ Male Pigtail Power Cable
36” Power Tap Cable
Remote Control Box
AN AFTERNOON IN THE PARK

Each Accessory on pages 110-123.

- Connects easily to FasTrack® with a Plug-Expand-Play Lock-on (sold separately)
- Connects to a traditional O/O27 track lock-on or to an accessory power supply (lock-on and power supply sold separately)
- AC and DC compatible

A Playground Playtime
- Seven simultaneous animations: four swings, two see-saws and one merry-go-round
- Twelve hand-painted figures
- Trash can conceals On/Off switch
- Mounting tabs to secure accessory to layout (optional)
- Dimensions: 6” L x 8” W x 3” H

B Tug-of-War
- Three animated figures on each side pull the rope back and forth
- On/Off switch is disguised on the top of the accessory
- Mounting tabs to secure accessory to layout (optional)
- Dimensions: 6” diameter x 3” H

C Pony Ride
- Four ponies move around the circle
- Four detailed figures
- On/Off Switch under attendant
- Mounting tabs to secure accessory to layout (optional)
- Dimensions: 6” diameter x 2” H

D Tire Swing
- Figure swings back and forth
- Realistic foliage
- On/Off switch on the underside
- Mounting tabs to secure accessory to layout (optional)
- Dimensions: 6” diameter x 8 1/2” H

E Playground Swing
- Two children swing back and forth
- Five hand-painted figures
- Dog conceals On/Off switch
- Mounting tabs to secure accessory to layout (optional)
- Dimensions: 4 1/2” L x 4 1/2” W x 3” H
F Shell Operating Oil Derrick
Capture the action of a real life oil derrick with this multi-action accessory, now upgraded to the Plug-Expand-Play system!

**FEATURES**
- Bubbling, illuminated tube simulates flowing oil
- Manually operate the winding drum to raise and lower hook
- Operating pump "nods" up and down
- Working block and tackle
- Die-cast metal generator
- Stamped metal base
- Includes five metal oil barrels
- Connects easily to FasTrack® with a Plug-Expand-Play Lock-on (sold separately)
- Connects to a traditional O/027 track lock-on or to an accessory power supply (lock-on, connector cable and power supply sold separately)
- AC and DC compatible
- Upgraded nodding donkey mechanism provides continuous quiet, reliable operation

6-83240  $119.99

G Classic Automatic Gateman
Gateman emerges from his shed to warn motorists of passing trains.

**FEATURES**
- Includes separate switch box to activate accessory
- Let your moving train activate the accessory by adding a Track Activator Pack to your track layout (sold separately)

6-81063  $94.99

I Rio Grande

6-82495  $129.99

H Pennsylvania

6-82263  $129.99

H-I SCRAP YARDS
These tired diesel locomotives have reached the end of the line. These busy workers are scrapping the locomotive. Watch the workers lift away the seat, remove the number board, and cut through the side.

**FEATURES**
- Four animations
- Seven hand-painted figures
- Flickering LED simulates a welder’s torch
- Dimensions: 8 1/4" L x 7 1/2" W x 3 1/4" H

6-81063  $94.99

New & Improved Mechanism
Buildings & Structures

A Burning Switch Tower
- Figure descends on the stairs
- Figure emerges from the building
- Operating smoke unit with On/Off switch
- Flickering interior illumination
- Includes separate switch box to control figure movement
- Activate accessory by train passing, connect accessory to Plug-Expand-Play Activator Track (sold separately)
- Dimensions: 6 1/2” L x 5” W x 7 3/4” H

B Bungalow House
Affordable housing helps any town grow. These Plug-Expand-Play houses include interior lighting and modular construction for maximum flexibility on any layout.

HOUSE FEATURES
- Interior illumination
- Dimensions: 8” L x 8” W x 5 1/4” H

6-82008  $79.99
6-82020  $129.99
Work Houses with Sounds

Add realistic sounds to your layout with one of our work houses with sounds! This sturdy structure is illuminated inside and out. It also plays realistic equipment sounds, activities, and includes announcements from workers busy on the job!

**FEATURES**
- Interior and exterior illumination
- Simulated window glass
- Includes a variety of sounds of workers, equipment and activities

**PLUG-EXPAND-PLAY FEATURES**
- Connects easily to FasTrack® with a Plug-Expand-Play Lock-on (6-83131 sold separately)
- Connects to a traditional O/027 track lock-on or to an accessory power supply (lock-on and power supply sold separately)
- AC and DC compatible
- Dimensions: 3" L x 2 1/2" W x 2 1/2" H

LOADING STRUCTURES

A #497 Coaling Station
- Raise and lower coal receiving bin
- Open hopper chutes to drop coal into awaiting cars
- Upgraded servo control for smoother, quieter operation of hopper chute.
- Includes separate control box for feature activations
- Stamped metal frame
- Requires an operating uncoupling track (sold separately)
- Compatible with all track systems
- Dimensions: 9 1/2" L x 6" W x 10" H

B-C Coal Dump Cars
- Dumps coal at the touch of a button
- Uncoupling Track section (sold separately) required
- Die-cast metal trucks and operating couplers
- Includes coal load and unloading bin
- Length: 9 1/2"
- Minimum Curve: 027

B Lionel Lines
- Dimensions: 9 1/2" L x 6" W x 10" H
- Requires an operating uncoupling track (sold separately)
- Compatible with all track systems

A Lionel Lines
- Dimensions: 9 1/2" L x 6" W x 10" H
- Requires an operating uncoupling track (sold separately)
- Compatible with all track systems
### #352 Icing Station

Keeping perishable freight cool was a tough job before the days of mechanical refrigeration. Watch as the figure pushes the ice cubes from the chute down to the awaiting Ice car (sold separately). Position the Ice car at the platform, and load it up.

**FEATURES**
- Ice is loaded into the house manually, then sent down the chute
- Can be upgraded to command control with the purchase of a SC-2 Switch Controller or an ASC2 (both sold separately)
- Includes On/Off/momentary switch
- Metal base
- 10 ice cubes
- Ice car sold separately
- Dimensions: 11" L x 4" W x 8" H

6-82028 $149.99

### Pacific Fruit Express Ice Car

- Die-cast metal sprung trucks and operating couplers
- Compatible with any Lionel Icing Station accessory
- Metal brake wheel
- Metal frame
- Includes twelve ice blocks
- Length: 10"
- Minimum Curve: O27

6-82052 $74.99

### Sante Fe Ice Car

- Die-cast metal sprung trucks and operating couplers
- Compatible with any Lionel Icing Station accessory
- Metal brake wheel
- Metal frame
- Includes twelve ice blocks
- Length: 10"
- Minimum Curve: 027

6-82048 $74.99
A Lionel Art Operating Billboard
This billboard features two classic catalogs from Lionel’s Postwar past, switching between the two images when accessory is on!

**FEATURES**
- Billboard automatically changes from one scene to the other
- On/Off switch
- Dimensions: 8” L x 2 1/4” W x 5” H

6-82017 $69.99

B Double Signal Bridge
- Spans two tracks
- Lights change from green to red to warn approaching trains of occupied blocks ahead
- Compatible with both FasTrack® and traditional tubular O and O27 track systems
- Use an insulated track section or a 153IR (both sold separately)
- Use with Plug-Expand-Play Accessory Activator (sold separately)
- Dimensions: 3 1/2” L x 10 1/4” W x 7 1/4” H

6-83174 $99.99

C Single Signal Bridge
- Lights change from green to red to warn approaching trains of occupied blocks ahead
- Compatible with both FasTrack® and traditional tubular O and O27 track systems
- Use an insulated track section or a 153IR (both sold separately)
- Use with Plug-Expand-Play Accessory Activator (sold separately)
- Dimensions: 3 1/2” L x 4 1/2” W x 7 1/4” H

6-83173 $79.99
D Oil Pump
Based on the “nodding donkey” style pump working oil fields across the country, this new Plug-Expand-Play accessory features the smooth bobbing action of the real thing. Add two or three oil pumps to model this common industrial scene.

FEATURES
• Pump moves up and down
• Dimensions: 2 3/4" L x 4 1/2" W x 4" H

6-82016 $59.99

E-F Floodlight Towers
• 8-light LED illumination on the single and 16-light LED illumination on the double
• Independent tilting head
• Screw-mount holes on base to secure accessory to layout (optional)

E Single 6-82012 $74.99
F Double 6-82013 $89.99

G Wind Turbine
Over 15" in height, this accurately designed turbine features spinning blades that rotate at a realistic constant speed.

FEATURES
• Realistic rotation of turbine blades
• Constant rotating speed
• Height: 15 1/2"

6-82015 $79.99
Smoke Fluid Loaders

Add smoke fluid to your steam or diesel locomotives with your Command Control system! Rotate the throttle on your CAB control unit to move the boom into position over your locomotive smoke stack. Once in position, dispense the proper amount of fluid in easy-to-control fluid drops at the press of a Cab remote button. Move the boom back in place by remote control and your locomotive is ready to roll!

Features
- Remote control function from CAB-1, CAB-1L, and CAB-2 includes:
  - Back and forth operation of boom arm
  - Fine-control release of smoke fluid
  - Fully programmable with individual ID number from 1-99
  - Quick drain feature for storage/service
  - Large smoke fluid reservoir housed inside fuel tank
  - Command operation only

A North American Smoke Fluid Loader
6-83635  $349.99

B Keystone Smoke Fluid Loader
6-83634  $349.99

A
B
New version of two Lionel classics! An optical beam senses when a culvert gondola is present, automatically triggering the hazard lights on top of the conveyor, followed three seconds later by the light in the control tower! Pair these up together for continuous loading and unloading operation.

REMOTE CONTROL FUNCTION FROM CAB-1, CAB 1L AND CAB 2 INCLUDES:

- Operating crane with magnet
- Operating warning lights
- Powerful maintenance-free motor
- Automatic IR triggered operation:
  - Culvert loading action on loader
  - Culvert unloading action on unloader
  - Interior lighting
  - Includes seven metal culverts
  - Compatible with Lionel Culvert Car (sold separately)
- Dimensions:
  - Loader: 13" L x 9" W x 8" H
  - Unloader: 13" L x 11" W x 8" H
TRACKSIDE CRANES

Offered for the first time as a gantry unit, this Scale sized trackside crane provides the highest level of loading and unloading action to your layout. Equipped with Command Control you can lower and raise the boom and hook lines, rotate the cab 360 degrees, and activate lighting all from your CAB remote controller. Add the separate-sale Crane Sounds Work House to add realistic crane sounds to your loading and unloading operations!

FEATURES
- LEGACY Control System-equipped operation including
- 360-degree Bi-directional cab rotation
- Up and down action of boom arm
- Independent control of the main and auxiliary hooks
- Independent control of crane lights
- CAB-2, CAB-1L, or CAB-1 remote control required
- Powerful maintenance-free motors
- Die-Cast Cab & boom
- Stamped metal cab floor
- Plastic superstructure
- Independent on/off control of electromagnet
- Add sounds synchronized to the actions of crane with the Crane Sounds Work House (6-82035, sold separately)

- Dimensions: 3” L x 2 ½” W x 2 ½” H

6-82035  $149.99
Gantry Crane

The popular “Triple-Action Magnet Crane” has been upgraded to give you control over more crane actions than ever before! Just like the postwar original, Lionel’s newest gantry crane provides remote control of cab rotation, turning the magnet on and off, raising and lowering the hook, and manual control of the boom. Additionally for the first time ever you now can also move the entire gantry crane back and forth on your track layout! Equipped with Command Control, all these special features are user-controlled through any CAB-1, CAB-1L, or CAB-2 remote controller.

Remote Control Functions From CAB-1, CAB-1L and CAB-2 Includes
- Forward and backward trackside movement of entire crane unit
- Crane cab rotation in either direction
- Raising and lowering the magnet
- Electromagnet activation
- Command only -- no conventional control for this accessory
- Special track section for unit motion available from other manufacturers (not included)

A Bucyrus-Erie
6-82097 $399.99

B Lionel Steel
6-82022 $399.99

FasTrack® Extended Truss Bridge

The all new FasTrack® Extended Truss Bridge is a perfect addition to every layout! Each bridge superstructure features detailed lattice work inside, exquisite molded-in exterior rivet details and simulated wood decking. Each bridge spans a full 30” in length and can be lifted off the piers to function as a “lift out” for a walk-through aisle in your layout. Each bridge comes with a pair of modular bridge piers.

**FEATURES**

- Modular snap-together pier design allows adjustable height to match FasTrack® or tubular track trestles
- Compatible with FasTrack®, each bridge can be adapted to work with all other track systems using a Transition Track (6-12040 sold separately) at each end
- Interior height of the bridge has adequate space to clear scale rolling stock
- Easily configured to connect multiple bridges
- Mounting tabs on bottom risers to secure piers to your layout
- Realistic lattice and rivet detail
- Bridge footprint (including piers): 39” L x 5 ½” W
- Footprint for 2 bridges: 73 ½” L x 5 ½” W

**Footprint for 2 bridges:**

73 ½” L x 5 ½” W

- Strobe light
- Realistic microwave panel details
- Dimensions: 2 1/4" L x 2 1/4" W x 16" H

6-37903 $69.99

**D Loading Ramp**
Expand on the loading and unloading activities on your layout with this realistic intermodal trackside ramp!

**FEATURES**
- Durable resin construction
- Bridge plate included
- Dimensions: 8 1/4" L x 3" W x 1 1/2" H

6-82870 $24.99
**A Die-Cast Metal Bumpers**
- Die-cast metal construction
- Only compatible with tubular O & O27 track
- Illuminated red lights
- Easily screws into place between outside rails
- Set of two
- Dimensions: 3" L x 1 1/4" W x 2" H

6-62283  $26.99

**B Auto Crossing Gate**
- Gate drops when train passes by
- 153C Contactor included
- Also works with insulated track section or 153IR (sold separately)
- Dimensions: 9 1/2" gate length

6-12714  $49.99

**C Railroad Bumpers**
- Easily snaps into place between outside rails of tubular O and O-27 track
- Set of three
- Dimensions: 3" L x 1 1/4" W x 1 1/2" H

6-12717  $7.49

**D #148 Dwarf Signal**
- Lights change from green to red when trains move through its block
- Automatically resets to green when train clears its block
- LED lighting
- Operates on 6-18 volt AC or DC power
- FasTrack® Accessory Activation Pack or insulated rail required
- Dimensions: 1 3/4" L x 1 3/4" W x 2" H

6-12883  $26.99

**E 153IR Controller**
- Die-cast metal structure
- Infrared sensors detect passing trains and activate connected accessories
- Time delay adjustment knob (from 3 to 15 seconds)
- Dimensions: 5" L x 4 1/2" W x 3 3/4" H

6-14111I  $45.99
## #154 Railroad Crossing Flasher
- Die-cast and stamped metal construction
- Red lights flash alternately when activated
- 153C Contactor included, or use a 153IR (sold separately)
- Also works with insulated track section (sold separately)
- Dimensions: 9" height

6-12888 $55.99

## Mainline Auto Crossing Gates
- Die-cast metal construction
- Red flashing signal
- Gate drops when train passes by
- Set of two
- 153C Contactor included
- Works with insulated track section (sold separately)

**LEGACY 360W PowerMaster**

The Legacy 360W Powermaster is the long awaited replacement for both the TPC300 and the TPC400!

Each 360W Powermaster includes a user settable switch to select 15 Amp or 20 Amp circuit protection. No additional cables are required for use with Lionel 135W or 180W Powerhouses. The 360W Powermaster includes all the same features as the 6-37146 LEGACY Powermaster; but handles up to 20 amps of power. Superior short circuit protection ensures reliable operation for all generations of Lionel products.

**FEATURES**
- Works with all Lionel Command Remotes: Cab-1, Cab-1L and Cab-2
- Control conventional locomotives wirelessly; control speed, direction, horn/whistle and bell
- Vary track power to fine-tune lighting, accessories and command equipped locomotives
- Wirelessly restore power after a derailment
- Receives commands wirelessly (no serial cable required)
- Use one LEGACY 360W Powermaster per track loop to operate conventional locomotives independently
- Controls up to 360 Watts of external power (two 180W Powerhouses)
- Compatible with all smooth sine wave transformers from all eras (with the addition of a 6-12893 Power Adapter Cable, sold separately)
- Equipped with dual Powerhouse sockets (no additional Powerhouse cabling required)

$219.99

**Power Adapter Cable**

The Power Adapter Cable connects your transformer to a PowerMaster for operating LEGACY, TMCC and non-TMCC equipped locomotives.

$19.99
