FIND US ON...

DEAR FRIENDS,

Welcome to an ALL NEW 2017 Volume 2 Catalog! In past years, Lionel has used our second annual catalog to showcase a few new items, along with a second look at many products shown earlier in the year. This year, we have so many new projects that we decided to devote the entire catalog just to those NEW items! Of course, you can always find the complete line of Lionel products available at your Lionel dealer or online at Lionel.com.

With the successful reception of our new Bluetooth™ control systems in our LionChief™ and LionChief Plus™ trains, we've carried it forward to all of our new LEGACY products as well. Now, in addition to the full-featured control of LEGACY, these locomotives offer the easy convenience of operation via the Universal Remote or free LionChief app on your compatible smart device.

From the stunning detail of our new Die-cast engines, the return of the much-requested Milwaukee S-3 and The Polar Express® scale Berkshire, to the powerful E6 Atlantics sized just right for smaller layouts; our roundhouse is filled with some amazing steam locomotives in striking new paint schemes!

For diesel fans, we have classic covered wagons and shovel-nosed E units, tunnel motors in an exciting array of new liveries and AC6000s to provide modern muscle.

All that power is going to need something to pull! We'll keep your locomotives busy with new 18" and 21" passenger cars, and new B60 baggage cars. Recreate

famous consists from coast to coast with these new sets! And don't miss this chance at The Polar Express® scale passenger cars – now with updated decoration.

The tank trains are back, and in more numbers and paint schemes than ever before! We're also offering colorful freight cars for every era, and in multiple road numbers to help you build long consists. New 66' gondolas come with or without graffiti. Well cars are available in up to 4 numbers per road, including EOT equipped cars for our modern modelers. We also have new early intermodal, X31 boxcars and 8000 gallon tank cars for transition era fans!

We've brought two new LionChief™ sets into the Volume 2 catalog as well! The Southern Pacific Rising Sun set is stunning. Our Hot Wheels set is guaranteed to re-ignite childhood memories and fun.

American Flyer fans will be happy to see a return of The Polar Express® sets, FlyerChief™ Berkshires and GP7s; all with Bluetooth. There are also many new freight cars in multiple road numbers to build great consists for these locomotives.

All this and 17 new Bluetooth™ LionChief Plus™ locomotives, new accessories to bring sound and animation to your layout, new American-made rolling stock and personalized items... Looks like we're running out of space again! What are you waiting for? Dive into the expanding world of Lionel!

THE LIONEL FAMILY

LIONEL GUIDE

OPERATION

LEGACY[™] Control System

 This revolutionary control system allows you to run your LEGACY[™] Control System-equipped locomotive just like a real engineer runs his trains. With its enhanced sounds and 200 speed steps, this system allows properly equipped engines to function with unparalleled options. The CAB-2 Remote Controller has an LCD screen display, vibration that simulates the effort of the locomotive, and other exciting operating features. The CAB-1L Remote Controller is a simplified alternative to unlock many LEGACY[™] features. New LEGACY[™] locomotives in this catalog can also be controlled by your smart device with the LionChief App with simplified control and functions.

ODYSSEY II Speed Control

 Slow speed and start-up operation are smooth and steady with ODYSSEY II Speed Control. Watch your locomotive as it creeps through the yard or fights up a grade without hesitation. Odyssey II also maintains your train's constant speed through curves and up and down grades.

Trainmaster Command Control

 Locomotives equipped with the classic TrainMaster Command Control system are controlled by commands from your CAB-1 or CAB-2 Remote Controller. ElectroCouplers[™], basic sounds, and multiple unit lash-ups are all at your fingertips as you walk around your layout.

ElectroCouplers[™]

 (LEGACY[™], LionChief Plus, TMCC[™] required) Open these couplers anywhere on the layout without uncoupling track sections. The CAB-1 or CAB-2 Remote Controller activates the ElectroCouplers[™].

Wireless Tether[™] Connection

 Looking to enhance the appearance of Lionel steam locomotives, we developed the exclusive infrared Wireless Tether connection so that the locomotive and tender can communicate without cumbersome wiring between the units. LEGACY[™] equipped steam locomotives have a new small profile housing that mounts to the top of the drawbar!

Traction Tires

One or more of the driving wheels are fitted with rubber tires for extra pulling power for hauling long trains. Traction tires grip the rails, enhancing tractive effort.

Bluetooth[®]

 These engines have Bluetooth on board, allowing them to connect with a compatible smart device.

LionChief[™] Plus Remote Control

 Using the same remote system of the basic LionChief[™], LionChief[™] Plus locomotives feature everything described in basic LionChief, PLUS many additional high-tech features that increase the realism of your operations. Additional features include fan-driven smoke, ElectroCouplers[™], flickering firebox on steam engines, RailSounds[™], speed control, higher detail, and the ability to operate with either a remote controller or a traditional transformer at the flip of a switch on your locomotive. LionChief[™] Plus provides high-tech features at an affordable price.

Starting in 2017, these locomotives also feature Bluetooth[™] compatibility so that you can also control them with your smart device.

Plug-Expand-Play[™]

 This revolutionary accessory system simplifies the setup and operation of your favorite accessories. Plug-Expand-Play[™] accessories easily connect to your layout for power using a standardized 3-pin cable that connects directly to a Plug-Expand-Play[™] Lock on track section. Separate control boxes that are necessary for control of some accessories also use the easy-to-use cable system. Many multi-operation accessories utilize a standardized 6-pin control cable, and there are separate-sale cables that allow you to expand your system to meet your needs. More complicated wiring necessary on older accessories is simplified with the new standardized cable system fitted on every Plug-Expand-Play[™] accessory.

SOUND & SMOKE

RailSounds[™]

 Widely regarded as the industry standard, the impressive RailSounds[™] sound system brings the real sounds of the railroad to your layout.

From the mechanical symphony of the locomotives, to the commotion of the station, you will be impressed by the digitally recorded samples of these special and authentic sounds.

LEGACY[™] Real-Time Quilling Whistle/Quilling Horn

On the CAB-2 remote, push up and ring the warning bell control button one ring at a time with your own rhythm signature! Pull down on the lever and the horn/whistle responds with increasing intensity. Like a real engineer, you develop your own signature sound, "quilling" the steam whistle or changing the harmonics and intensity of the diesel horn.

Braking Sounds

Press down on the brake button of your CAB-2, CAB-1L, or CAB-1 to reduce speed incrementally or rapidly decrease your throttle and listen for the screeching of your locomotive's brakes.

Start-Up and Shut-Down

Listen as the diesel engine turns over or the steam locomotive comes to life. You will also hear the sounds of the giant locomotive gradually fade away when you turn off power.

LEGACY[™] Sequence Control

Press and hold AUX1 for 3 seconds on your CAB-2, CAB-1L, or CAB-1 and experience the latest LEGACY[™] RailSounds[™] feature: Sequence Control. Using just the throttle, hear brake release, bell, whistle signals and corresponding dialog as your train traverses an entire journey from departure to destination.

LEGACY[™] Fueling and Current Speed

While stopped, hear the sounds of refueling (water, coal, or diesel fuel). In motion, command your engineer to speak his current railroad speed and fuel levels. All at the touch of a button from your CAB-2, CAB-1L, or CAB-1.

Diesel RPM

Throttle up your locomotive and listen as the locomotive's RPMs increase. Our LEGACY[™] RailSounds[™] offers 8 levels of diesel engine RPMs. While the RPM sounds automatically intensify with the speed of the engine and the power supplied to the track, you can also fine-tune the levels with your Remote Controller.

DynaChuff[™]

A favorite feature among steam fans, DynaChuff is the varying intensity of the locomotive's chuffing, synchronized with the speed of the locomotive.

CrewTalk[™] Communication and TowerCom[™] Announcements

(LEGACY[™] required for complete feature set)

This is radio communication between your locomotive and tower. "You're cleared outbound", orders the dispatcher and the engineer replies. You can trigger different conversations, depending on your choice of button-press and whether the locomotive is in motion or stopped. Change to any of six railroad speeds with accompanying dialog or hear your engineer report his status while en route.

StationSounds[™]

With a StationSounds-equipped passenger car, you will hear the station's loudspeaker announce arrivals and departures. En route, the conductor makes dining reservations and station stop announcements.

Smoke

Fan-driven smoke units provide a steady flow of smoke, and puffing smoke units create short blasts of smoke as the locomotive moves along the track. For the most realistic smoke effects, synchronized smoke units coordinate the blasts of smoke with the revolution of the drivers and the DynaChuff sounds of the locomotive.

Steam Effects

These smoke effects bring select steam locomotives to life like never before. Each steam effect features a blast of smoke to simulate steam shooting from the whistle, blowdown, or cylinder valves, often along with the authentic corresponding sound.

ILLUMINATION

Directional Lighting

When in reverse, Command Control equipped diesel locomotive headlights will shut off. The rear light or headlight of a second diesel will then illuminate. In Command Control equipped steam locomotives, the headlight remains illuminated in forward or reverse operation. Additionally in reverse, the tender back-up light will shine on tenders equipped with a rear directional lamp.

Classification Lights and Marker Lights

Classification lights are located on the boiler front or top of some steam locomotives, while marker lights are on the rear of some steam locomotive tenders. These lights are also located on the ends of some diesel locomotives.

MARS Lights

Mars lights are a warning light on the front of some steam and diesel locomotives. Real Mars lights move back and forth across the track in a figure 8 motion. Our models recreate this effect with a pulsating LED.

Lighted Number Boards

Brightly illuminated, the locomotive's unique road number is displayed on the boiler top of some steam locomotives and on the ends of some diesel locomotives.

Strobe Light

This flashing warning light is located on the cab roof of some diesel locomotives.

Ditch Lights

These low-mounted lights serve as close-range secondary headlights on some diesel locomotives.

Variable Ashpan Glow

Start up a Lionel steam locomotive equipped with this feature and look for a red glow on the outside of the locomotive between the ashpan and firebox. As speed increases, the light grows brighter, simulating the increased draft onto the fire.

Ground Lights

These low mounted lights are located below the cab on the sides of some steam and diesel locomotives. They face downward toward the ground to help the crew gauge diesel movement at slow speeds.

Glowing Firebox and Flickering Firebox

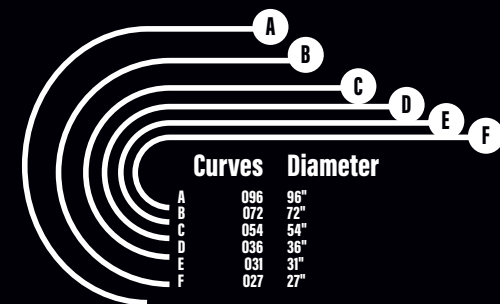

A red glow steadily emanates from the firebox inside of the cab of Lionel steam locomotives equipped with the glowing firebox. Steam locomotives equipped with a flickering firebox create the illusion of a live fire "flickering" within.

Built
to
Order

BUILT TO ORDER

Lionel is moving forward with a Built-To-Order process for a number of our high end steam and diesel engines. We want to enhance the collectible nature for the products you purchase as well as ensure we are able to continue to offer new and innovative items in the future.

You will see the icon above on the product pages that feature Built-To-Order products. Please check with your local dealer and on Lionel.com to ensure you do not miss the order window.

Lionel Traditional

- Based on classic Lionel designs
- Approximate scale proportions
- Perfect additions to Lionel ready-to-run train sets
- Can run on any O-Gauge track curve, even O27 (unless noted otherwise)

Lionel O Scale

- Accurate reproductions of rolling stock and locomotives
- Scale proportions
- Super-detailed with many separately applied parts
- Check the Minimum Curve requirement for each car or locomotive

SOME LIONEL BASICS

Gauge

Gauge refers to the distance between the outside rails of the track. Lionel O-Gauge track systems—which include O, O27, and FasTrack—all measure 1 1/4" between the outer rails. Any O-Gauge car or locomotive can ride on Lionel O-Gauge track, as long as the curve track used on your layout can accommodate your particular cars (see Minimum Curve section).

Scale

Scale measures the relationship between a model and the real thing. Most Lionel cars generally measure about 1:48 scale. This relationship is approximate for the Lionel Traditional line of cars and locomotives, which typically can run on layouts with tight curves (like O27 or O31). Lionel O Scale freight cars and engines, which are made to be as exact as possible to 1:48 scale, oftentimes require a wider minimum curve, such as O36 or more.

Minimum Curve

This measurement is very useful in purchasing track, locomotives, and rolling stock that are compatible with one another. For example, assemble O72 curved track into a circle and you will have a 72" diameter layout. Assemble O31 curved track into a circle, and you will have a layout 31" in

diameter. A locomotive with a Minimum Curve requirement of O31 will run on a layout with O72 curves, but a locomotive with a Minimum Curve requirement of O72 will not run on a layout with O31 curves.

Traditional vs. O Scale

Lionel O-Gauge locomotives and rolling stock are divided into two basic categories—Traditional and O Scale. Both lines are O-Gauge and can be run together if Minimum Curve requirements allow. Generally, the difference is a matter of size and consistent proportions. O Scale locomotives and cars are kept as close to scale dimensions as practical. Traditional O locomotives and cars may be compressed to better operate on tight curves.

Recommended Minimum Curve

Lionel locomotives and rolling stock are thoroughly tested to determine their Minimum Curve requirement. In some cases, a Lionel car or locomotive may be able to easily negotiate most, but not all, possible track configurations for that Minimum Curve. For these products, a Recommended Minimum Curve is also given. This larger measurement allows for all combinations of Lionel track and switches.

Lionel's incorporation of Bluetooth integrates the tradition of model railroading with the latest smart-device technology. This development brings new and novel ways to run trains and interact with other train enthusiasts. Not only will existing model railroading fans enjoy this innovative way of running your train, but this is a great way to bring today's younger generation into the world of model railroading as well!

- Compatible with New Lionel LEGACY*, O-Gauge, S-Gauge, and Lionel HO Trains!
- Control different locomotives from the same device!
- Connect Wirelessly!

LEGACY® STEAM LOCOMOTIVES ON PAGES 10-19 ARE EQUIPPED WITH THESE GREAT FEATURES.

- **LEGACY® Control System** – equipped – able to run in LEGACY® Control mode, in TrainMaster Command Control mode, or in Conventional mode with a standard transformer
- **Bluetooth® Control** – Operate with Universal Remote or LionChief® App with all of the features shown on pg. 6-7 (excludes K4 on pg. 34-35)
- **Odyssey® II Speed Control**
- **LEGACY® RailSounds®** sound system featuring:
 - CrewTalk™ dialog and TowerCom™ announcements, each with different scenarios depending on whether the locomotive is in motion or stopped
 - Six official railroad speeds with CrewTalk dialog
 - DynaChuff™ synchronized with 32 levels of intensity as the locomotive gains speed
 - LEGACY® “Real-Time Quilling Whistle” control with instant response for realistic signature “quilling” and correctly timed warning signals
 - Single hit or continuous bell sounds
 - Sequence Control: plays the sound effects of an entire trip, including warning sounds and announcements, based on the movement and speed of the locomotive
 - Current speed and fuel dialog, coal-loading sound effects
- IR Transmitter works with LCS SensorTrack™
- Powerful maintenance-free motor with momentum flywheel
- Wireless Tether™ connection between locomotive and tender
- **ElectroCoupler™** on rear of tender
- Directional lighting including operating headlight and back-up light on rear of tender
- Illuminated classification lights on the front of locomotive
- Traction tires
- Interior illumination in cab
- Die-cast metal locomotive body, pilot, and trucks
- Die-cast metal tender body and trucks
- High level of separately applied metal details
- Separately applied builder’s plate
- Synchronized fan-driven smoke unit
- Adjustable smoke output
- Authentically detailed cab interior
- Cab “glass” windows
- Engineer and fireman figures

BERKSHIRES

Among the most highly-regarded steam locomotives of all time, these Berkshires remain an enduring legacy to the epitome of steam engineering and are as popular today as during their heyday. Available again in the most popular schemes in new road numbers as well as some new and colorful additions to the Lionel roster, it's time to add some Super Power to your roundhouse! The last run of these locomotives sold out quickly, don't miss your opportunity this time.

See LEGACY® Steam locomotive features on pages 8-9.

- ADDITIONAL FEATURES**
- Working Mars light where appropriate
 - Polished side rods on "excursion" locomotives, blackened side rods for "in service" schemes
 - Length: 26"
 - Minimum Curve: 054

THE POLAR EXPRESS™

THE POLAR EXPRESS™ SCALE BERKSHIRE #1225

Back and updated by popular demand! Start or expand THE POLAR EXPRESS in grand fashion with this scale Berkshire and 18" passenger cars. These heavyweights have been updated with snow decoration on the roofs and THE POLAR EXPRESS name moved below the window line as it appears in the pages and on screen.

Due to the fast sell-out and high demand for our special anniversary gold scale set, an additional run of these coaches has been produced to help you expand your special consist. Don't miss out on the magic. These cars always sell out quickly; see your dealer to place your orders today!

A favorite of Milwaukee Road and steam fans is back with the fabulous S-3 Northern! Built in 1944 for fast freight service on the Milwaukee's mainlines, the S-3's brilliant careers were cut short by diesels in 1954. Thankfully, two have been saved and since her return to operation, No. 261 has logged thousands of miles in her new role as an ambassador and educator for steam heritage and technology.

Lionel's re-release of this stunning model includes innovative features like cylinder steam whistle sounds, air horn sounds, and working red emergency light on the smokebox. "Lackawanna" 1661 pays tribute to a role played by the 261 in 1994, standing in as a DL&W Pocono for a Steamtown video. While wartime production lent itself to more austere paint schemes, no doubt one of these beauties would have been a fitting and stunning match to the railroad's Hiawatha passenger trains. We've taken some liberties to create a "what if" version sure to be a perfect match for your model consists!

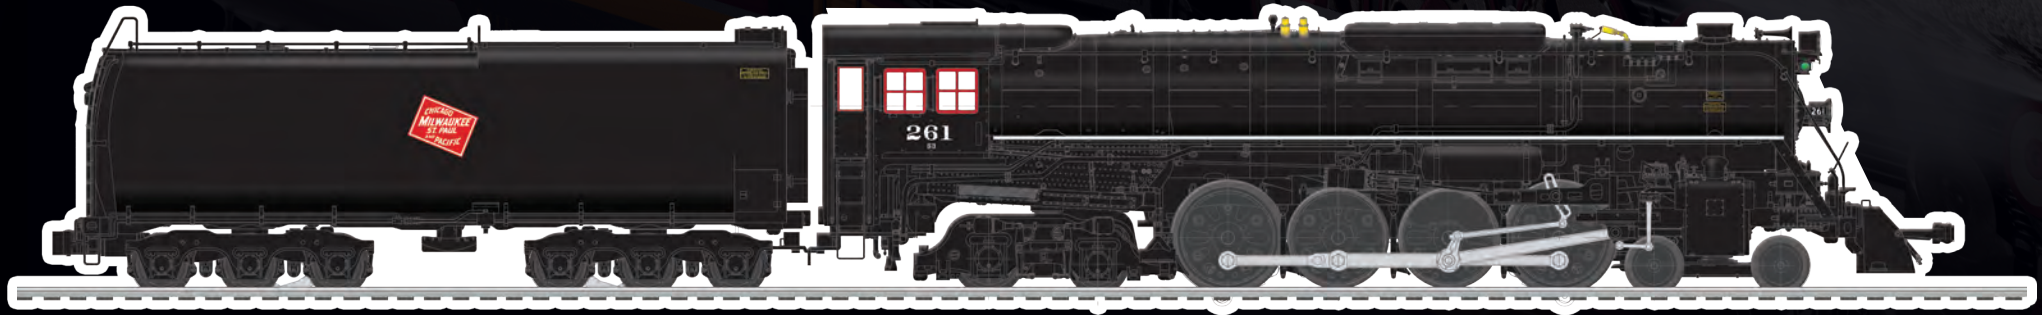

SEE LEGACY® STEAM LOCOMOTIVE FEATURES ON PAGES 8-9.

- ADDITIONAL FEATURES**
- Kinematic drawbar between locomotive and tender keeps close spacing, expanding on curves for clearance
 - Cylinder steam effect emits smoke from the steam chest
 - Quillable steam whistle and air horn
 - Operating emergency Mars light
 - Separate scale-wheeled pilot truck included
 - Length: 28"
 - Minimum Curve: 054

E6 ATLANTIC

Besting larger locomotives in speed, power and efficiency from the days of their construction during World War I until their final retirement in the 1950s, the E6 remains a lasting tribute to the engineering minds which made the Pennsylvania the "Standard Railroad of the World." Respected by enginemen and engineers alike, the E6 was swift, powerful, easy to fire and sublime in its simplicity. So well-built were the class that they continued to earn fame and set records decades after their construction.

This latest release of Lionel's tribute to the Pennsy classic chronicles those decades of success and innovation with several new features. Available for the first time with both Bluetooth and LEGACY control, our E6 offers the same benefits of advanced technology and ease of operation that the real railroaders enjoyed. The locomotive comes equipped with Whistle Steam and several new additional details from previous releases including some specific to each road number offered.

The 2017 release includes the most famous of the Big E's, No. 460, as she appeared at the end of her long career, complete with "Bullseye" marker lights. No. 1163 had a moment in the spotlight earlier in her career leading a special train for the visiting Prince of Wales and is modeled in her 1930s dress when keystone number plates and electric headlights adorned the locomotive along with full gold and tuscan striping on the cab and tender. No. 68 represents the more simplified look of the class during the 1940s and 50s. The E6s were at their best along the level routes of the PRSL and Long Island. Check out the matching passenger cars on pages 32-37 to complete appropriate consists for any of these trusty steeds. While the Great Northern never rostered an E6, they did have earlier Atlantics and No. 1707 represents a nice "What If" look if their own design had continued.

**BRASS HYBRID
3160 CLASS 2-8-2**

Baldwin built 228 Mikados for Santa Fe's 3160-Class between 1918 and 1920. Nearly a century after their introduction, Lionel is proud to announce an unparalleled model of this yeomen workhorse. With a brass body and tender on a die-cast frame, this new model combines the best of fine-scale prototype realism with the reliable construction, operation and features you've come to expect from our LEGACY® die-cast locomotives! This locomotive is available exclusively from Lionel and will never be built again! Get yours today before they are gone forever.

SEE LEGACY® STEAM LOCOMOTIVE FEATURES ON PAGES 8-9.

Bluetooth®

A NEW! Cotton Belt #9389
6-84637 \$599.99

Originally developed to prevent overheating in the many tunnels and snow sheds of the Southern Pacific's mountain routes, the "Tunnel Motors" could often be found wandering far from those hills. Most of the venerable locomotives outlived the Espee and Rio Grande to find new careers on the Union Pacific, leasing companies and regional railroads all around the country. Offered in some of the classic original schemes as well as the kaleidoscope of new patched and repainted schemes. The patriotic Cotton Belt 9389 represents a unique bicentennial scheme applied to the similar SD45T-2 - but just too cool not to offer on our model!

E3/E6 AA SET

The E3 and E6 locomotives shared a distinctive car body instantly recognizable by the pronounced slanted nose at the front of the locomotives. These streamliners ran point on some of the country's most colorful and famous passenger trains. Back in the Lionel catalog for the first time in many years, the E6 is available now for the first time with LEGACY and in some striking new and familiar color schemes!

SEE LEGACY® DIESEL LOCOMOTIVE FEATURES ON PAGES 20-21.

- AA SETS FEATURES**

A NEW! Santa Fe F3 AA Set
6-85186 \$849.99

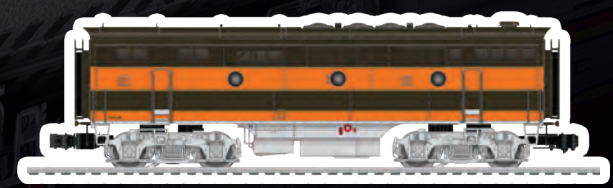

E MD's "Covered Wagons" were a common sight on America's rails from the 1940s to the 1970s. While all shared a common form, there were many detail differences in the locomotives of different lines, and even from different build dates. This latest release of LEGACY® F3 and F7 locomotives includes some fan favorites and new schemes all with road-specific detailing. Build your full lash-ups with a pair of A units and B units - including the return of the "SuperBass" B units for the ultimate in power and sound performance!

B NEW! Santa Fe Powered F3 B

A NEW! GE Demonstrator #6000 6-84843 \$649.99

As EMD and GE battled for horsepower supremacy in the 1990s, General Electric introduced the 6000 HP AC6000 as the ultimate in power for heavy mainline railroading. Ultimately, like many locomotives which pushed the limits before, the AC6000 performed less admirably than desired on the rails and in sales. Only two railroads purchased the locomotive in production. Southern Pacific had ordered 3 but was merged with Union Pacific prior to their delivery.

Lionel is proud to bring this locomotive back into the line in new paint schemes including three worn by the locomotives as demonstration and test units for GE and the SP units that almost were. Add some high horsepower to your mainlines!

PENNSYLVANIA BROADWAY LIMITED

Relive the gilded age of rail travel on the Broadway Limited! From the nameplate on the smokebox of the K4 with coast-to-coast tender to the drumhead on the open-platform observation car, this train is first class all the way! Four 18" passenger cars complete with lighted interiors with figures feature the finely-stripped paint scheme and Pullman lettering of the train's cars through the early decades of the 20th Century. Expand your train with additional sleepers and dining car available separately.

SEE LEGACY® STEAM LOCOMOTIVE FEATURES ON PAGES 8-9.

B60 BAGGAGE CARS

A classic Pennsylvania Railroad design, the B60 class of baggage cars could be found all across the PRR and connecting lines. With express traffic traveling in dedicated cars across longer routes, B60s often showed up at the front of trains on many railroads. Lionel's first issue of these models covers four of their common arrangements on the Pennsylvania as well as the connecting Long Island and Pennsylvania-Reading Seashore Lines. Prototypical variations include doors, roof style and vents and each version is available in two road numbers.

FEATURES

- Die-cast metal sprung trucks and operating couplers
- Separately applied metal details
- Interior lighting
- Illuminated marker lamps
- Length: 11 1/4"
- Minimum Curve: 042

THE CHAMPION

The Atlantic Coast Line and Florida East Coast launched the first Champion on December 1, 1939 - just in time to whisk passengers from the chilly North to the warmth of south Florida. The trains' consist varied over the years to include coach, sleeper, dining and parlor cars as well as head end traffic. Our models represent the look of the cars around 1950, when roofs were still silver, letter boards still purple and a round-end observation could still be found on the tail end of the train. The add-on 2 Pack features a sleeping car appropriately lettered for the Pennsylvania which handled the train between Washington and New York. These cars will look right at home behind your ACL or FEC E6 or E8 diesels or a Pennsy GG1.

FEATURES

- Die-cast operating "Kinematic" couplers auto adjust for close coupling on straightaways and wider coupling on curves
- LED lighting with capacitors for flicker-free running
- Separately applied details on undersides and bodies
- Narrow or full width Diaphragms per prototype
- All-New body tooling
- Durable plastic bodies
- Detailed interiors
- Flush-fitting windows
- Scale Coupler mounting pads
- Die-cast metal sprung trucks
- Set Length: 81"
- Minimum Curve: 054

ORIENTAL LIMITED

The Oriental Limited carried the banner as the Great Northern's flagship train in the 1920s and 1930s. The all-heavyweight consist included a unique two-tone green scheme and marked the first use of the mountain goat on a Great Northern drumhead. It was also one of very few trains where the train name itself replaced the railroad or Pullman name on the letter boards. Recreate the heavyweight era on one of the most scenic routes in America with this train!

FEATURES

- Die-cast metal sprung trucks and operating couplers
- Hidden uncoupling tabs
- Flexible diaphragms between cars
- Opening doors
- Detailed interior floor plan and figures
- Overhead interior lighting with ON/OFF switch
- Length: 38" (19"/car)
- Minimum Curve: 054

8K TANK CARS

These smaller tank cars found service in a variety of diverse and interesting loads and paint schemes. Add some color to your consists with these new tank cars!

- FEATURES**
- Die-cast metal trucks and operating couplers
 - Separately applied metal details
 - Die-cast metal platforms, ends and air cylinders

TANK TRAIN 2-PACKS WITH END OF TRAIN DEVICE

Fitted with flexible piping between the cars, blocks of Tank Train tanks could be unloaded from a single connection to make unloading faster and facilities more compact. Commonly associated with the "oil can" trains on the Southern Pacific, Tank Train operations can be found all across North America and continue today. Add or expand on these interesting operations on your layout with these new sets! End car sets feature the correct piping for the lead and tail car, including a working End of Train Device on the coupler of the last car. Add intermediate cars to stretch your consist with 8 numbers available in each scheme! Typical cuts of cars range from three to thirteen cars.

FEATURES

- 2-Packs Feature:
 - 1 "A" end car
 - 1 "B" end car with working EOT
 - 1 Connecting hose / pair
- Intermediate Cars Feature:
 - 1 Car for placement between A and B ends
 - 1 Connecting hose
- All Cars Feature:
 - Die-cast metal trucks with rotating bearing caps and operating couplers
 - Flexible connecting hose between tank cars
 - Separately applied metal details
- Length: 31" (15 1/2" / car)
- Minimum Curve: O31

A NEW! Renz Hobby Shop
6-85185 \$299.99

On May 20th 2017, Theodore "Teddy" Renz, Lionel's Customer Service Lead Repair Technician, was the victim of a tragic automobile accident. Teddy passed away the following day as a result of his injuries. His death is a huge loss to his family, his friends, and the Lionel team.

To honor Teddy, Lionel has created this special tribute to a wonderful man whose life was cut heartbreakingly short.

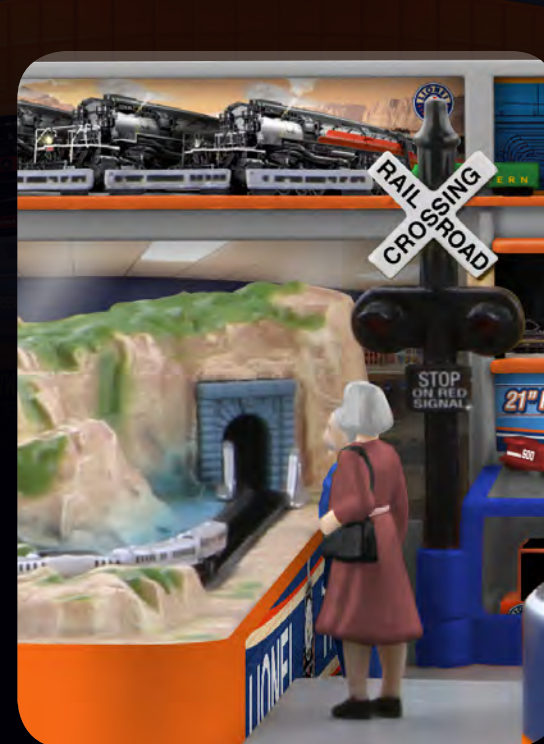

Theodore "Teddy" Renz

Teddy had a love for rescuing animals and owned three rescue dogs. To honor his heart for animals in need, Lionel will donate a portion of the proceeds from the sale of Renz Hobby Shop to Best Friends, a 501(c)(3) non-profit organization that operates the nation's largest sanctuary for homeless animals.

LIONEL COLLECTORS AMERICA CLUB of AMERICA EST 1970

Lionel Collectors Club of America has been dedicated to collecting and operating Lionel model toy trains. Members have a special opportunity to share information, attend model train events, buy, sell and trade toy collector trains, but most of all, make new friends.

This is your opportunity to join thousands of others in this legendary club and enjoy the benefits of an excellent relationship between LCCA and Lionel.

Experience great benefits like:

- Lionel catalogs mailed right to your door
- Exclusive model train publication including: "The Lion Roars" and "Interchange Track"
- Invitations to member only events, conferences and other club activities
- Access to Lionel club exclusive product
- 10% discount at www.LionelStore.com*

* Not valid with any other promotional code nor on e-gift certificate purchases.

To join online, or to print out an application, visit www.lionelcollectors.org
